Designing Interactive Systems: A comprehensive guide to HCI, UX and interaction design, 3/E

David Benyon, Centre for Interaction Design, Edinburgh Napier University

ISBN-10: 1447920112 • ISBN-13: 9781447920113
©2014 • Pearson • Paper, 640 pp
Published 13 Sep 2013 • Instock

Our price: £42.99

Courses

Table of Contents

Part I: Essentials of designing interactive systems

1. Designing interactive systems: A fusion of skills
2. PACT: A framework for designing interactive systems
3. The process of human-centred interactive systems design
4. Usability
5. Experience design
6. The Home Information Centre (HIC): A case study in designing interactive systems

Part II: Techniques for designing interactive systems

7. Understanding
8. Envisionment
9. Design
10. Evaluation
11. Task analysis
12. Visual user interface design
13. Multimodal user interface design

Part III: Contexts for designing interactive systems

14. Designing websites
15. Social media
16. Collaborative environments
17. Agents and avatars

18. Ubiquitous computing
19. Mobile computing
20. Wearable computing

Part IV: Foundations of designing interactive systems

21. Memory and attention
22. Affect
23. Cognition and action
24. Social interaction
25. Perception and navigation

- 1.1 The variety of interactive systems
- 1.2 The concerns of interactive systems design
- 1.3 Being digital
- 1.4 The skills of the interactive systems designer
- 1.5 Why being human-centred is important

- 2.1 Introduction
- 2.2 People
- 2.3 Activities
- 2.4 Contexts
- 2.5 Technologies
- 2.6 Scoping a Problem with PACT

- 3.1 Introduction
- 3.2 Developing personas and scenarios
- 3.3 Using scenarios throughout design
- 3.4 A scenario-based design method

- 4.1 Introduction
- 4.2 Accessibility
- 4.3 Usability
- 4.4 Acceptability
- 4.5 Design principles

- 5.1 Introduction
- 5.2 Engagement
- 5.3 Designing for pleasure
- 5.4 Aesthetics
- 5.5 Service design

- 6.1 Introduction
- 6.2 Scenarios for the HIC
- 6.3 Evaluating early interface prototypes
- 6.4 A first design
- 6.5 The second interface design

- 7.1 Understanding requirements
- 7.2 Participative design
- 7.3 Interviews

- 7.4 Questionnaires
- 7.5 Probes
- 7.6 Card sorting techniques
- 7.7 Working with groups
- 7.8 Fieldwork: Observing activities in situ
- 7.9 Artefact collection and 'desk work'
- 8.1 Finding suitable representations
- 8.2 Basic techniques
- 8.3 Prototypes
- 8.4 Envisionment in practice
- 9.1 Introduction
- 9.2 Conceptual design
- 9.3 Metaphors in design
- 9.4 Conceptual design using scenarios
- 9.5 Physical design
- 9.6 Designing interactions
- 10.1 Introduction
- 10.2 Expert evaluation
- 10.3 Participant-based evaluation
- 10.4 Evaluation in practice
- 10.5 Evaluation: further issues
- 11.1 Goals, tasks and actions
- 11.2 Task analysis and systems design
- 11.3 Hierarchical task analysis
- 11.4 GOMS: a cognitive model of procedural knowledge
- 11.5 Structural knowledge
- 11.6 Cognitive work analysis
- 12.1 Introduction
- 12.2 Graphical user interfaces
- 12.3 Interface design guidelines
- 12.4 Psychological principles and interface design
- 12.5 Information design
- 13.1 Introduction
- 13.2 Using sound at the interface
- 13.3 Tangible interaction
- 13.4 Getting a feel for tangible computing
- 13.5 Gestural interaction and surface computing
- 14.1 Introduction
- 14.2 Website development
- 14.3 The information architecture of websites
- 14.4 Navigation design for websites
- 14.5 Case study: designing the Robert Louis Stevenson website
- 15.1 Introduction
- 15.2 Background ideas

- 15.3 Social networking
- 15.4 Sharing with others
- 15.5 Cloud computing
- 16.1 Introduction
- 16.2 Issues for cooperative working
- 16.3 Technologies to support cooperative working
- 16.4 Collaborative virtual environments
- 16.5 Case study: developing a collaborative Table-Top application
- 17.1 Agents
- 17.2 Adaptive systems
- 17.3 An architecture for agents
- 17.4 Other applications of agent-based interaction
- 17.5 Avatars and conversational agents
- 18.1 Ubiquitous Computing
- 18.2 Information spaces
- 18.3 Blended Spaces
- 18.4 Home environments
- 18.5 Navigating in wireless sensor networks
- 19.1 Introduction
- 19.2 Context awareness
- 19.3 Understanding in mobile computing
- 19.4 Design
- 19.5 Evaluation
- 20.1 Introduction
- 20.2 Smart materials
- 20.3 Material design
- 20.4 From materials to implants
- 21.1 Introduction
- 21.2 Memory
- 21.3 Attention
- 21.4 Human error
- 22.1 Introduction
- 22.2 Psychological theories of emotion
- 22.3 Detecting and recognising emotions
- 22.4 Expressing emotion
- 22.5 Potential applications and key issues for further research
- 23.1 Human information processing
- 23.2 Situated action
- 23.3 Distributed cognition
- 23.4 Embodied cognition
- 23.5 Activity theory
- 24.1 Introduction
- 24.2 Human communication

- 24.3 People in groups
- 24.4 Presence
- 24.5 Culture and identity
- 25.1 Introduction
- 25.2 Visual perception
- 25.3 Non-visual perception
- 25.4 Navigation
